Summary

Technical Product Manager with nearly 7 years of experience in payments and financial infrastructure, specialising in payment orchestration, payment rail optimisation, and end-to-end partner integrations across high-growth and emerging markets (SEA, MENA, India). Deep expertise in improving authorisation rates, scaling multi-rail payment flows, and managing third-party payment processor relationships. Proven track record in API-first product development, cross-functional collaboration with engineering, compliance, and fraud teams, and data-driven prioritisation. Hands-on experience with crypto on/off-ramp solutions and digital asset payment flows.

Skills

Domain Expertise: Payment Rail Optimisation, B2B Payments, Payment Orchestration, Payment Routing, Payment Aggregation, Card Networks (Visa/Mastercard), Payout Orchestration, Cross-Border Payment Flows, Crypto On/Off-Ramp, 3DS Protocol (EMVCo), ACS Platforms, Card Authentication (CNP/CP), B2C E-commerce, Retail-Tech, Omnichannel Commerce, Digital Assets, Conversion Rate Optimisation

Product Skills: 0→1 product discovery, Agile Methodologies, User Acquisition and Retention, Marketplace Dynamics, Roadmap Planning, Requirements Gathering, Wireframing, A/B Testing, Quantitative and Qualitative Data Analysis, RCA

Business Skills: Stakeholder Management, Cross Collaboration, Product Strategy, Competitor Analysis, Partner and Merchant Onboarding, GTM, B2B, B2C, SaaS

Technical Skills and Tools: Postman, SQL, Confluence, JIRA, Figma, BigQuery, Grafana, Kibana, Jenkins, Basecamp

AI Tools and Automation: Claude Code, OpenClaw, Hermes Agent, Prompt Engineering, AI Agent Development (n8n/LangChain), Agentic workflows (MCP, Anthropic skills), Vibe Coding, LLM Fine-tuning (Claude, Gemini), Automated Integration Workflows

Work Experience

Paysecure Technology Ltd., *Technical Product Manager*

Mar 2025 – Present

AI-Driven Product Innovation

- Automated gateway integrations using **LLM-based models** (ChatGPT, Claude, Gemini), reducing integration turnaround time from **2 weeks to 2 days** for **50+ gateways** including Worldpay, Checkout.com, and Stripe.
- Supported **30+ enterprise merchants** during onboarding with **automated workflow reviews**, technical guidance, and interactive product demos built via rapid AI-assisted prototyping.
- Pioneered Vibe Coding (AI-assisted rapid prototyping) methodologies to create functional prototypes and API flows, replacing traditional documentation to accelerate delivery cycles for **10+ enterprise merchants** and internal engineering teams.
- Rolled out an **AI-powered checkout** deposit model using behavioural and transaction signals, lifting **average deposit value by 9.7%**.

Product Strategy and Technical Execution

- Own payment orchestration strategy for a B2B payment gateway serving global merchants, managing a portfolio worth **\$50 million** of payment rails across **card networks**, **crypto solutions**, and alternative payment methods in SEA, MENA, and APAC.
- Led **300+** end-to-end integrations with global **Payment Service Providers (PSPs)**, **Acquirers**, **Networks**, and **Third Party Service Providers (TSPs)**, defining clear technical requirements, scalable API flows, and smooth partner onboarding.
- Delivered **Visa and Mastercard** Network Tokenisation capabilities end-to-end, working directly with card schemes on implementation, improving **authorisation rates by 4.2%** and reducing **CNP fraud by 31%**.
- Authored **10+ PRDs** for crypto on-ramp and off-ramp payment flows, card payment features (**Google Pay** with DPAN/FPAN tokenisation, **Apple Pay**, **pre-authorisation** flows, and **recurring payments**), translating compliance-sensitive requirements into actionable technical specs.
- Scaled **dynamic payout orchestration** with intelligent routing and manual review workflows, optimising transaction routing for **20+ merchants** based on **risk scoring** and scheme-level performance data.
- Enabled **Variable Recurring Payments** through mandate billing workflows, improving payment success rate by **17%**.
- Architected a **Customer Analytics Engine** that maps shared customer attributes across profiles to identify linked users, reduce **fraud by 24%**, and enable automated real-time risk scoring, customer limits, geo-location, IP and RFM segmentation.
- Built and maintained a developer platform including sandbox environments, **API documentation** (10+ modules), and **onboarding tooling**, reducing **merchant integration errors by 20%** and enabling **4x faster onboarding**.
- Collaborated with a **12-member engineering team**, 4 QAs, and 1 designer on API design, data models, and optimised documentation using AI to reduce technical debt and maintain documentation accuracy.

- Drove **global payment integrations** worth **\$3.4M GMV** across SEA and MENA regions, leading a cross-functional team of 12 engineers, 3 QAs, and a designer using Agile/Scrum methodologies.
- Built an **A/B testing** platform leveraging advanced statistical methods (e.g., binomial tests, t tests) for 10+ microservices, achieving **98% statistical validity across 200+ releases**, decreasing merchant go-live timelines by **4 weeks**.
- Authored **20+ Root Cause Analyses (RCAs)** and executed **50+** actions, ensuring **99.9% uptime** and system resilience for high-traffic commerce portals.
- Delivered **5+ B2B SaaS** payment features optimising payment flows across 10+ payment methods (UPI, cards, wallets, bank transfers), compliant with PCI-DSS, AML, and KYC, achieving a **5% increase in Success Rate (SR)**.
- Automated gateway integrations using **LLM-based AI models**, reducing **Turnaround Time (TAT)** by **75%** for 10+ global Payment Gateways including **Razorpay, PAYU, Easebuzz, and Cashfree**, accelerating merchant onboarding.
- Integrated a **Gen AI-powered chatbot**, reducing support ticket volume by **38%** and improving feedback scores by **15%**.
- Revamped **UI/UX** of **5+ dashboards**, cutting customer complaints by 34% and saving **2000+ man-hours** annually.
- Led an internal retry project, analysing **100K+ error codes and messages**, saving **INR 366.6 Million GMV** for 100+ merchants.
- Revamped **10+ developer documentation** modules, enabling **4x faster** and seamless merchant onboarding on APIs.

Shaadi.com, Associate Product Manager

Jun 2021 – Aug 2022

- Conducted 150+ user discovery sessions and **12 surveys** to identify friction points, launching features that **boosted user engagement** and **7-day retention by 5%**, two key metrics for platform-led e-commerce growth.
- Spearheaded **integration of 3 new features**, driving a **15% growth in DAU** and enhancing user interaction on the platform.
- Designed and executed **push notification strategies**, leading to a **23% increase in click-through rates (CTR)**.
- Developed and implemented methodologies that elevated **Android app ratings from 4.1 to 4.25** while increasing daily reviews count by **63%** from **160 to 260**, fostering improved customer trust and loyalty.

Infosys Ltd., Specialist Programmer

Jun 2017 – Apr 2019

- **Automated** report generation using Java by parsing **1M+** SQL query logs, **reducing processing time from 8 hours to 15 minutes**.
- Monitored and optimised **Microsoft Azure** pipeline activities, achieving a **50% improvement** in operational performance.
- Developed organised data layer tables for ETL projects at American Express, reducing **data processing time by 60%**.

Amazon, Software Development Engineer Intern

May 2016 – Jul 2016

- Migrated Amazon's Delivery Rule Portal using Java's Spring Web MVC framework, **reducing system downtime by 30%**.
- **Resolved concurrency** issues during rule file uploads, improving **efficiency by 50%** and reducing processing delays.
- **Optimised** file storage on **Amazon S3**, enhancing **data retrieval speed by 40%** and improving system scalability.

Education

IIM Kozhikode, Master's in Business Administration, MBA

Jun 2019 – May 2021

IIT Roorkee, Bachelor's in Technology, Computer Science and Engineering

Jun 2013 – May 2017
