Summary

Technical Product Manager with nearly 7 years of experience in payments and financial infrastructure, specializing in payment processing, payment orchestration, and end-to-end partner integrations across high-growth emerging markets. Deep expertise in authorization rates, multi-rail payment flows, and third-party processor relationships across the MENA and SEA payments ecosystem. Proven track record in API-first product development, product strategy and roadmap ownership, go-to-market execution, cross-functional collaboration, and data-driven prioritization.

Skills

Domain Expertise: Payment Rail Optimization, B2B Payments, Payment Orchestration, Payment Routing, Alternative Payment Methods (APMs), Card Networks (Visa/Mastercard), Payout Orchestration, Cross-Border Payment Flows, B2C E-commerce, Open Banking, PSD2, SCA, SEPA, SEPA Instant, Faster Payments, Conversion Rate Optimization, Fraud Prevention, KYC/KYB, AML, PCI-DSS, Regulatory Compliance, 3DS2 Authentication (EMVCo), Card Authentication (CNP/CP), POS Payments

Product Skills: 0-to-1 product discovery, Customer Development, Agile Methodologies, User Acquisition and Retention, Marketplace Dynamics, Roadmap Planning, Requirements Gathering, Wireframing, A/B Testing and Experimentation, Quantitative and Qualitative Data Analysis, RCA

Business Skills: Stakeholder Management, Strategic Partnerships, Cross Collaboration, Product Strategy, Competitor Analysis, Partner and Merchant Onboarding, Go-to-Market (GTM), B2B, B2C, SaaS

Technical Skills and Tools: Postman, SQL, Confluence, JIRA, Figma, BigQuery, Grafana, Kibana, Jenkins, Basecamp

AI Tools and Automation: Claude Code, OpenClaw, Hermes Agent, Prompt Engineering, AI Agent Development (n8n/LangChain), Agentic workflows (MCP, Anthropic skills), Vibe Coding, LLM Fine-tuning (Claude, Gemini), Automated Integration Workflows

Work Experience

Technical Product Manager, Paysecure Technology Ltd.

Mar 2025 - Present

- Own product strategy and **North Star KPIs** (authorization rate, success rate, routing quality) for a **\$50 million** payment-rails portfolio, launching and scaling payment products across new markets in SEA, MENA, and APAC.
- Cut gateway-integration turnaround from **2 weeks to 2 days** across **50+ gateways** (Worldpay, Checkout.com, Stripe) by building LLM-based integration automation and replacing static documentation with AI-generated prototypes and API flows.
- Shipped **300+** end-to-end integrations with global PSPs, acquirers, card networks, and TSPs by owning the **integrations roadmap for payment processing** and leading a cross-functional team of **12 engineers**, 4 QAs, and a designer.
- Improved **authorization rates by 4.2%** and cut **CNP fraud by 31%** by delivering Visa and Mastercard **network tokenization** end-to-end in direct partnership with card schemes.
- Increased **Success Rate by 10%** and reduced **user drop-offs by 5%** by partnering with external providers (Token.io, Ivy, SendSpend) to launch **Open Banking** and validate **product-market fit** with 10+ merchants.
- Improved recurring-payment success rate by **17%** by enabling **Variable Recurring Payments** via mandate billing, and defined a 3-phase **smart-retry roadmap** targeting **10-35%** failed-payment recovery after benchmarking **7 global processors**.
- Increased payout **authorization rates by 5%** by scaling **dynamic payout orchestration** with intelligent routing and manual review workflows across **20+ merchants**, using risk scoring and scheme-level performance data.
- Reduced **fraud by 24%** by architecting a **Customer Analytics Engine** that links customer profiles and automates **fraud prevention** with real-time risk scoring, customer limits, geo-location, IP, and RFM segmentation.
- Lifted **average deposit value by 9.7%** by rolling out an **AI-powered checkout** deposit model built on behavioral and transaction signals.
- Cut **merchant integration errors by 20%** and enabled **4x faster onboarding** by building a developer platform with sandbox environments, **10+ API documentation** modules, and onboarding tooling.
- Translated regulatory and compliance-sensitive requirements into **10+ PRDs** spanning crypto on/off-ramp flows, Google Pay (DPAN/FPAN tokenization), Apple Pay, **COF/MIT recurring payments**, and **chargeback protection**.
- Drove adoption of **5 new payment methods** and enabled **\$2 million GMV** across **30+ enterprise merchants** by leading **go-to-market and merchant enablement**, structured discovery, and AI-prototyped product demos.
- Drive **point-of-sale (POS) market entry into Zambia**, a **\$5 million monthly GMV** programme, scoping terminal, acquiring-switch (ISO 8583), and card and mobile money integrations with local banking partners to expand into African markets.

- Drove **global payment integrations** worth **\$3.4M GMV** across SEA and MENA regions, leading a cross-functional team of 12 engineers, 3 QAs, and a designer using Agile/Scrum methodologies.
- Built an **A/B testing and experimentation** platform leveraging advanced statistical methods (e.g., binomial tests, t tests) for 10+ microservices, achieving **98% statistical validity across 200+ releases**, decreasing merchant go-live timelines by **4 weeks**.
- Authored **20+ Root Cause Analyses (RCAs)** and executed **50+** actions, ensuring **99.9% uptime** and system resilience for high-traffic commerce portals.
- Delivered **5+ B2B SaaS** payment features optimizing **checkout conversion** and payment flows across 10+ payment methods (UPI, cards, wallets, bank transfers), compliant with PCI-DSS, AML, and KYC, achieving a **5% increase in Success Rate (SR)**.
- Automated gateway integrations using **LLM-based AI models**, reducing **Turnaround Time (TAT)** by **75%** for 10+ global Payment Gateways including **Stripe, Adyen, and Checkout.com**, accelerating merchant onboarding.
- Integrated a **Gen AI-powered chatbot**, reducing support ticket volume by **38%** and improving feedback scores by **15%**.
- Revamped **UI/UX** of **5+ dashboards**, cutting customer complaints by 34% and saving **2000+ man-hours** annually.
- Led an internal retry project, analyzing **100K+ error codes and messages**, saving **INR 366.6 Million GMV** for 100+ merchants.
- Revamped **10+ developer documentation** modules, enabling **4x faster** and seamless merchant onboarding on APIs.

Associate Product Manager, Shaadi.com

Jun 2021 - Aug 2022

- Conducted 150+ user discovery sessions and **12 surveys** to identify friction points, launching features that **boosted user engagement** and **7-day retention by 5%**, two key metrics for platform-led e-commerce growth.
- Spearheaded **integration of 3 new features**, driving a **15% growth in DAU** and enhancing user interaction on the platform.
- Designed and executed **push notification strategies**, leading to a **23% increase in click-through rates (CTR)**.
- Developed and implemented methodologies that elevated **Android app ratings from 4.1 to 4.25** while increasing daily reviews count by **63%** from **160 to 260**, fostering improved customer trust and loyalty.

Specialist Programmer, Infosys Ltd.

Jun 2017 - Apr 2019

- **Automated** report generation using Java by parsing **1M+ SQL query logs**, **reducing processing time from 8 hours to 15 minutes**.
- Monitored and optimized **Microsoft Azure** pipeline activities, achieving a **50% improvement** in operational performance.
- Developed organized data layer tables for ETL projects at American Express, reducing **data processing time by 60%**.

AI Projects

- **Developer Docs Platform (Paysecure)**: rebuilt API documentation as a React + OpenAPI 3.1 app using AI coding agents: **100 structured pages, 127 interactive API requests** with a 9-language request console, Git-backed editing, and CI/Netlify deployment.
- **AI Chatbot with Long-Term Memory**: Anthropic Memory Tool, tool-use streaming, and prompt caching; live web app.
- **YouTube Summarizer**: long-context LLM pipeline with prompt caching and structured outputs; live web app.
- **Khabar (AI News Agent)**: autonomous daily AI news briefings via Telegram, in production since May 2026.

Education

IIM Kozhikode, Master's in Business Administration, MBA

Jun 2019 - May 2021

IIT Roorkee, Bachelor's in Technology, Computer Science and Engineering

Jun 2013 - May 2017
